ENHANCE ACCURACY AND QUALITY OF CARE

Real-time information improves quality of care and saves lives. Bluebird enables positive patient, specimen and medication identity throughout every point of care — reducing manual errors and having a positive impact on the quality of care and patient safety.

IMPROVE STAFF COLLABORATION

Efficient staff communication and collaboration result in better care and faster decisions. Bluebird solutions enable real-time communication among clinicians, nurses, and other hospital staff, allowing the collaboration process more efficient.

BETTER OPERATIONAL EFFICIENCY

Mobile technology and the use of barcodes and RFID streamline everything from patient record and drug administration to inventory control and asset tracking. Connected nurses and clinicians can spend more time bedside with the patient and less time on computer.

	EF500	EF400
Size	155.6 x 77.95 x 16.5 mm	136.3 x 68 x 15.9
Weight	260g	200g
Operating System	Android 6.0 (Marshmallow), Android 5.1 (Lollipop) Windows 10 IoT Mobile Enterprise	
CPU	1.2 GHz Quad Core	
Durability	IP67 classified, clean with common disinfects	

# A Single Device that Meets Multiple Healthcare Needs

Bluebird delivers seamlessly integrated solution which unify data sources and workflows. The EF400 and EF500 can replace multiple devices needed to perform tasks such as calling/texting, scanning barcodes and increasing medication administration accuracy. Robust platform integrates with EHR system such as Epic, enabling clinicians to access patient information at the point-of-care. By consolidating these applications into one device, tasks can be executed with ease and proficiency ensuring efficient patient-centered care.

What Benefits Can Your Nurses and Staff Enjoy?
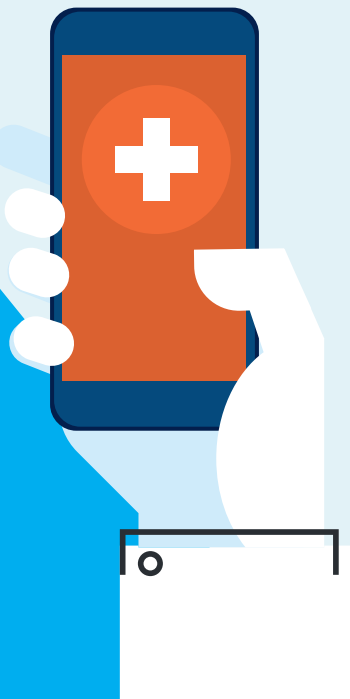

• Disinfectant-Ready Housing
Designed to withstand regular exposure to harsh cleaning agents, the EF400/EF500 is compatible with a variety of common wipe forms of disinfectant solutions used in hospitals to sanitize medical devices.

• Full-Shift Power
Bluebird's efficient power management solution and user-replaceable battery delivers the longest shift, and Hot Swap mode lets the users change the battery without having to reboot, keeps the device in full service.

• Best-in-Class Scanning Performance
With the advanced scanning technology, clinicians capture 1D and 2D barcodes, and the most problematic barcodes found in pharmacies, labs, and at the point-of-care, quickly and accurately.

• Efficient Voice Communication with BlueSIP™
Bluebird VoIP software solution BlueSIP™ provides cost-effective, flexible voice communication that allows to extend PBX features to Bluebird mobile computers, turning them into fully-featured mobile deskphones that empower nurses and clinicians to provide better patient care.

• Durability for Everyday Use
EF400/EF500 looks sleek like a smartphone, but it delivers enterprise durability that consumer device lacks. Built for all-day use in the healthcare environment, the device have been engineered to withstand drop and shock, as well as exposure heat and freezing temperatures.

• Enterprise Security and Support
With Bluebird's device management solution BluePRO™, EF400/EF500 provides initial provisioning and device control, allowing multi-user log-on and easy device sharing while delivering enterprise security by preventing unauthorized users from accessing data, as well as the installation and opening unauthorized apps.
